

UTTSHOB PAUL

Computer Science & Engineering Student | Python / Backend Developer

GitHub: github.com/uttshobpaul • LinkedIn: linkedin.com/in/uttshobpaul

• Email: uttshobpaul@gmail.com • Phone: +91 8420429584

PROFILE

CSE undergraduate with hands-on experience building Python web applications using Django and Flask, relational databases, REST-style APIs, and responsive frontends. Interested in backend development, database-driven systems, and practical application security.

EDUCATION

Guru Nanak Institute of Technology (GNIT), Kolkata | B.Tech, Computer Science & Engineering | GPA: 8.12

2024 – 2028

TECHNICAL SKILLS

Languages: Python, Java, C++

Frameworks: Django, Flask

Web: HTML5, CSS3, JavaScript

Databases: MySQL, SQLite

Backend: REST-style APIs, CRUD, Django MVT

Security: PBKDF2-SHA256, salted hashing, rate limiting, input validation

Tools: Git, GitHub, VS Code

PROJECTS

Geodesic Map Authentication | *Python, Flask, SQLite, HTML, CSS, JavaScript, Leaflet*

GitHub: github.com/uttshobpaul/MAP_Authentication

- Built a map-based authentication system where users register and authenticate using an ordered sequence of map points instead of a typed password.
- Implemented Flask REST-style endpoints for registration, authentication, validation, and entropy analysis with SQLite persistence.
- Protected stored coordinates using salted PBKDF2-HMAC-SHA256 hashing and constant-time hash comparison; added failed-attempt lockout/rate limiting.
- Created an interactive Leaflet frontend with point selection, sequence tracking, entropy visualization, and login decoy markers.

Library Management System | *Python, Django, MySQL, HTML, CSS, JavaScript*

GitHub: github.com/uttshobpaul/library_managing_system

- Developed a Django-based library system for member management, book cataloging, issue/return workflows, and borrowing history.
- Implemented search/filtering, membership borrowing limits, book availability tracking, automatic overdue status, and ₹2/day fine calculation.
- Designed relational models and forms with validation for members, books, ISBNs, borrowing records, dates, and inventory consistency.
- Built a responsive custom UI with dashboard statistics, detailed records, status notifications, and reusable Django templates.

CERTIFICATIONS & TRAINING

Python Fullstack Developer Virtual Internship

EduSkills Academy • AICTE / Ministry of Education supported • 10 weeks • Jan–Mar 2026

GenAI Powered Data Analytics Job Simulation

Tata • Forage • Completed Aug 8, 2025 • EDA, AI-based delinquency prediction, data storytelling
